

Anti-Theft & Security Systems & Diagnostics

In this class we will look the operation and diagnostics of the most common systems. With the increase of customer options, we have more and more of these different systems witch need to interact with the security systems in different ways. We will cover how these systems interact within the vehicle and what inputs are required to enable the system requirements. We will cover fault issues and diagnostics that arise with the input and module interaction. Manufacture systems covered in-depth will include Chrysler, Ford, GM, Nissan, Toyota and Honda. Other manufactures will be referenced.
