

TESTED, TRUSTED, STOPPING POWER

COATED BRAKE CALIPERS WITH

The Ultimate Protection Against Salt, Snow & Harsh Elements

What is TechShield 360™ E-coat Technology?

TechShield 360 is a proprietary electrodeposition coating applied to brake calipers via an automated submersion process.

TechShield 360™

- Bonds with both aluminum and cast iron and is microns thin.
- Resists natural and synthetic brake fluids.
- Coats calipers and brackets edge-to-edge, inside and out leaving all surface areas with a protective coating.
- Spreads evenly and to a similar thickness.
- Offers complete corrosion protection with product/process consistency.
- Meets OSHA and EPA standards and is environmentally friendly and heavy metal-free.
- Passes a 96-hour continuous salt spray validation test.

TechShield 360™ is a trademark of BBB Industries®
Nugeon® is a registered trademark of BBB Industries®
