STARTERS & ALTERNATORS

100% NEW PARTS

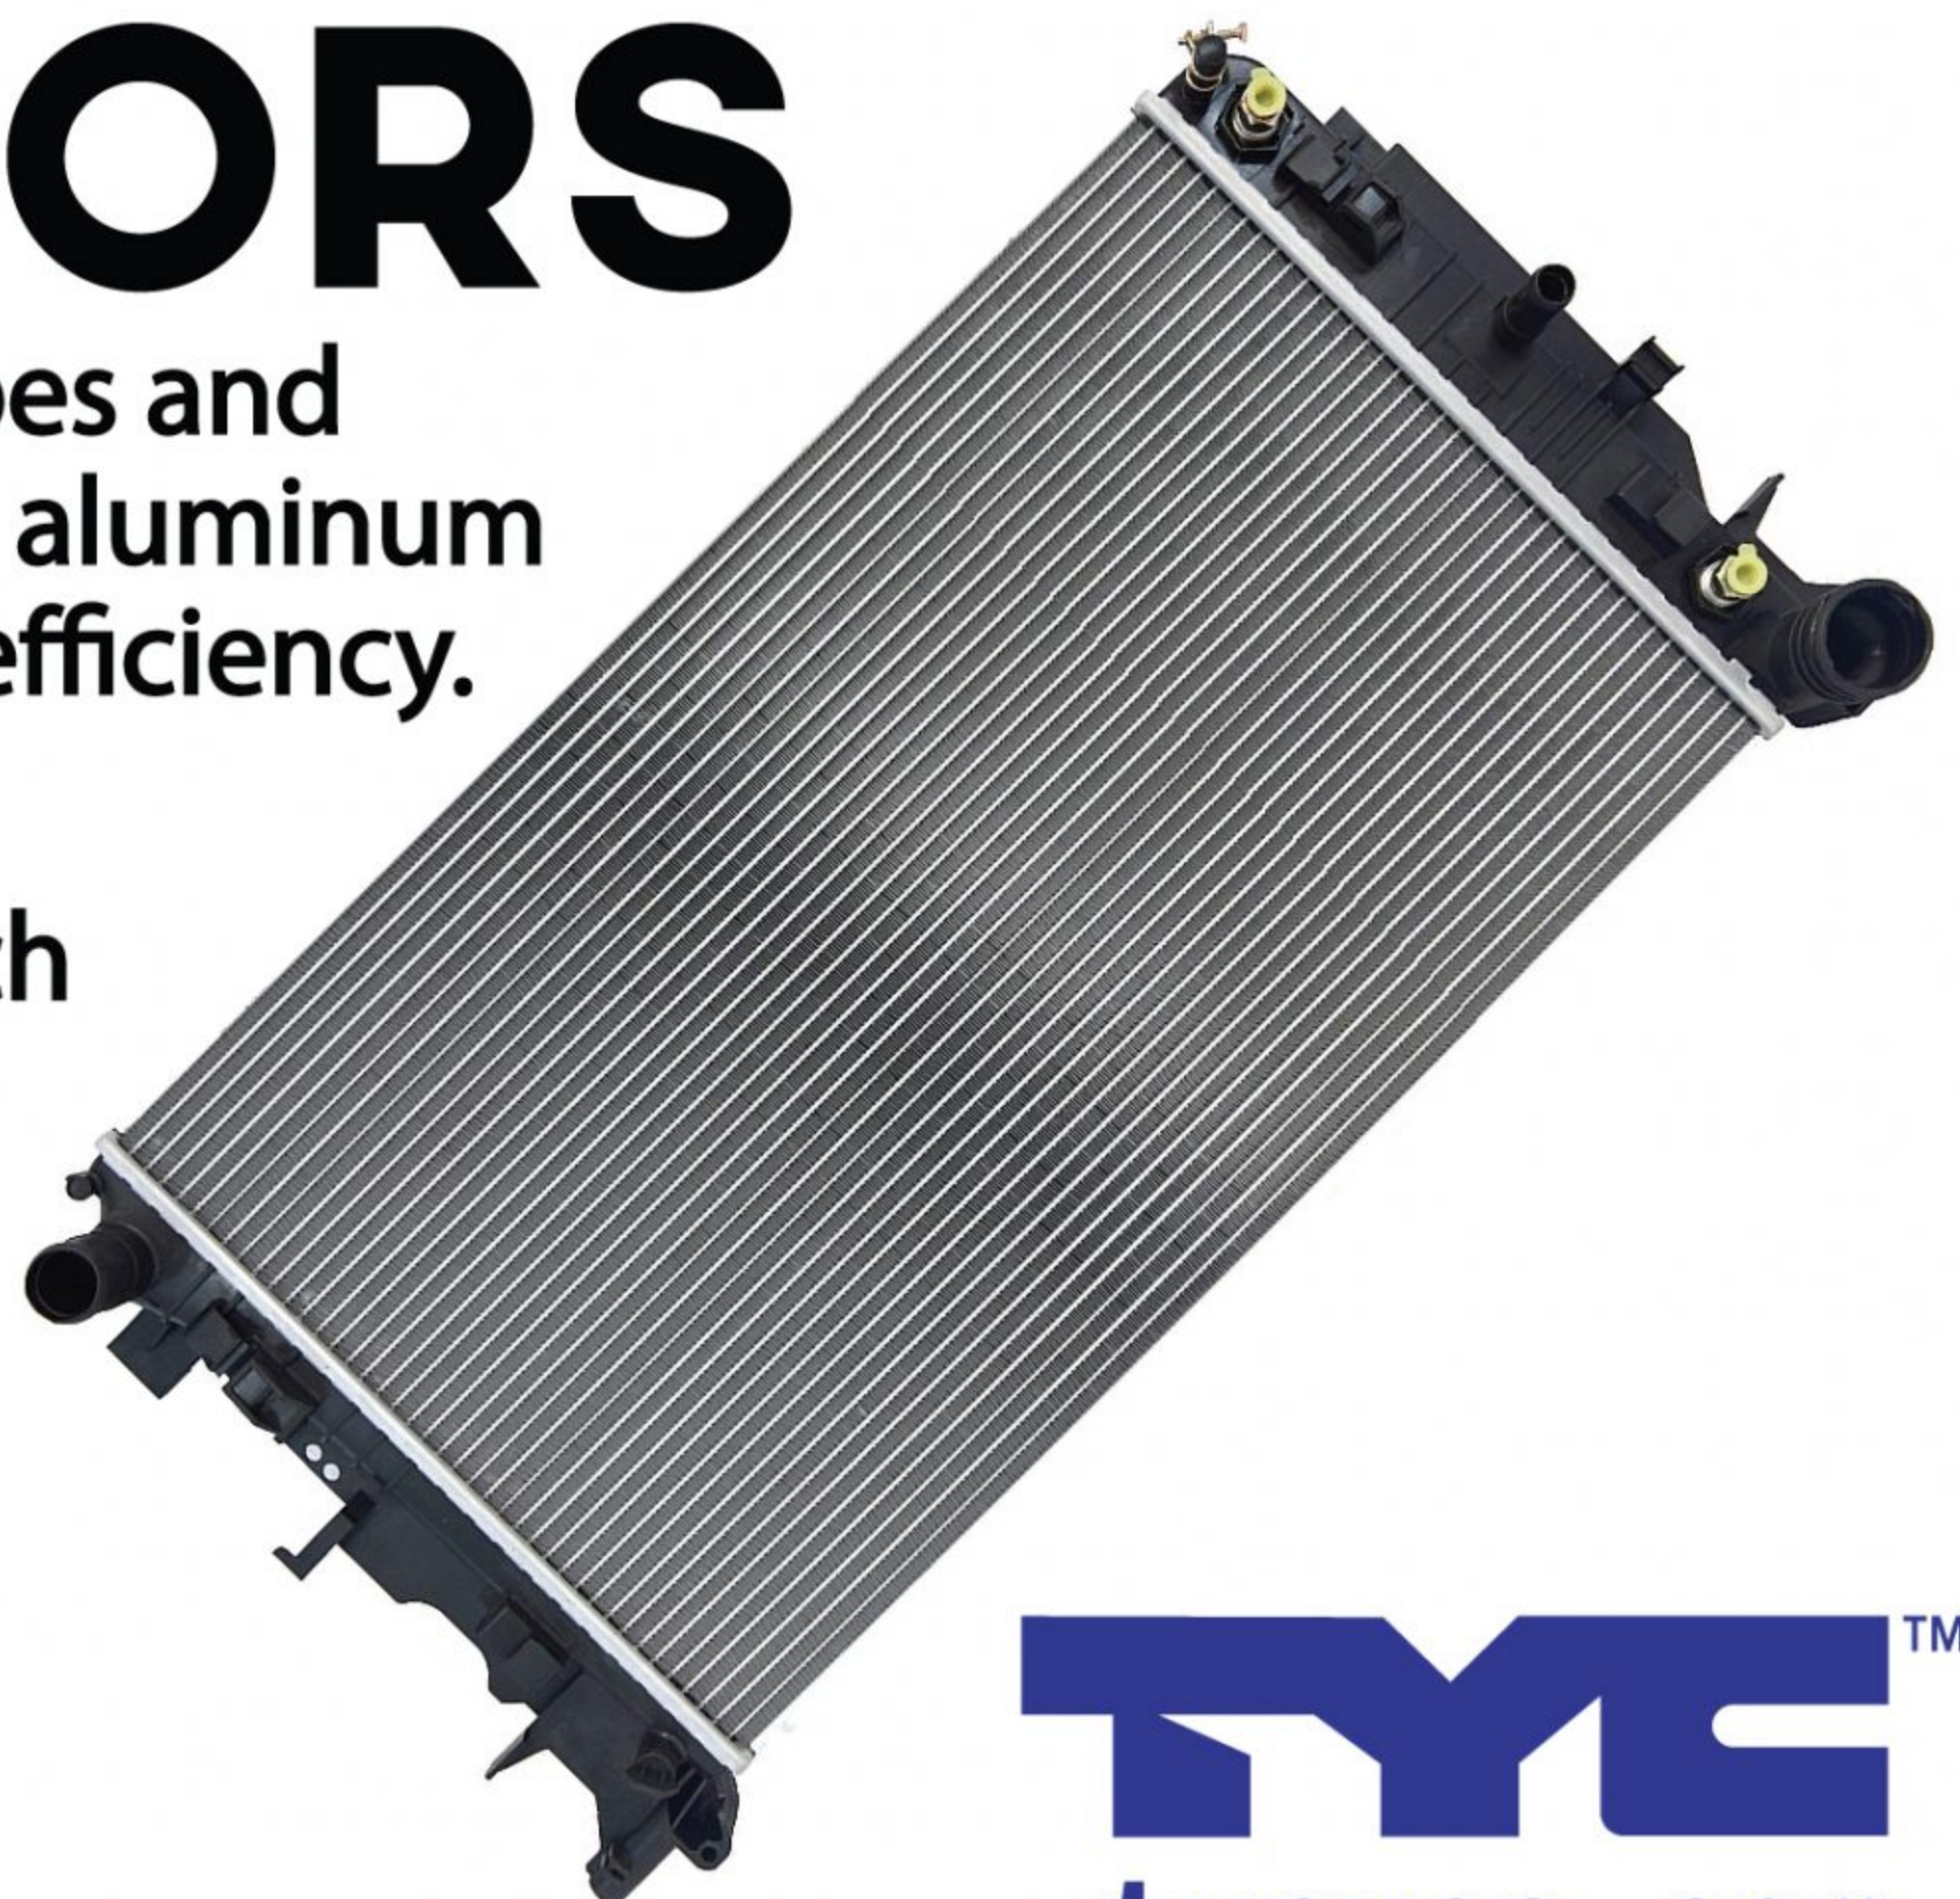

Our alternators and starters are built brand new; inside and out, with no recycled or rebuilt internal components. The bearings, field casing, rotor, rectifier, stator, diode, regulators are all 100% new.

TYC™ starters and alternators are checked and tested for fit, form and function while adhering to OE specifications.

RADIATORS

- Premium grade aluminum tubes and precision folded and louvered aluminum fins ensure optimum cooling efficiency.
- Comparable tubes and fin pitch to the OE counterpart ensure similar coolant flow volume.
- Nocolok® furnace-brazing process ensures unparalleled performance and durability.
