

STAINLESS STEEL TUBING

Looks Like Stainless, Lasts Like Stainless...
Bends, Cuts, and Flares Like Standard Steel!

LIFETIME WARRANTY!

316L marine-grade soft-annealed stainless steel with added molybdenum for ultimate corrosion resistance.

Standard 0.028" wall thickness provides strength while remaining workable with standard brake cutting, bending, and flaring tools.

Stunning polished stainless steel finish suitable for all automotive applications where appearance is critical.
