

DURAGO

DURAGOPARTS.COM

DuraGo[®] is the professional's preferred choice for quality, safety and service in premium brake rotors and drums. Each of our parts are engineered to meet all requirements of fit, form and function. To ensure quality, we use multiple vane configurations and castings engineered to SAEJ431 metallurgical standards.

FIRST TO MARKET

- First to market applications place DuraGo customers ahead of its competition.
- Expansive line includes the most import & domestic late model applications available.
- When introduced, first to market applications are both cataloged and available.
- New part numbers are scrubbed for consolidations, controlling part proliferation and ensuring quality.

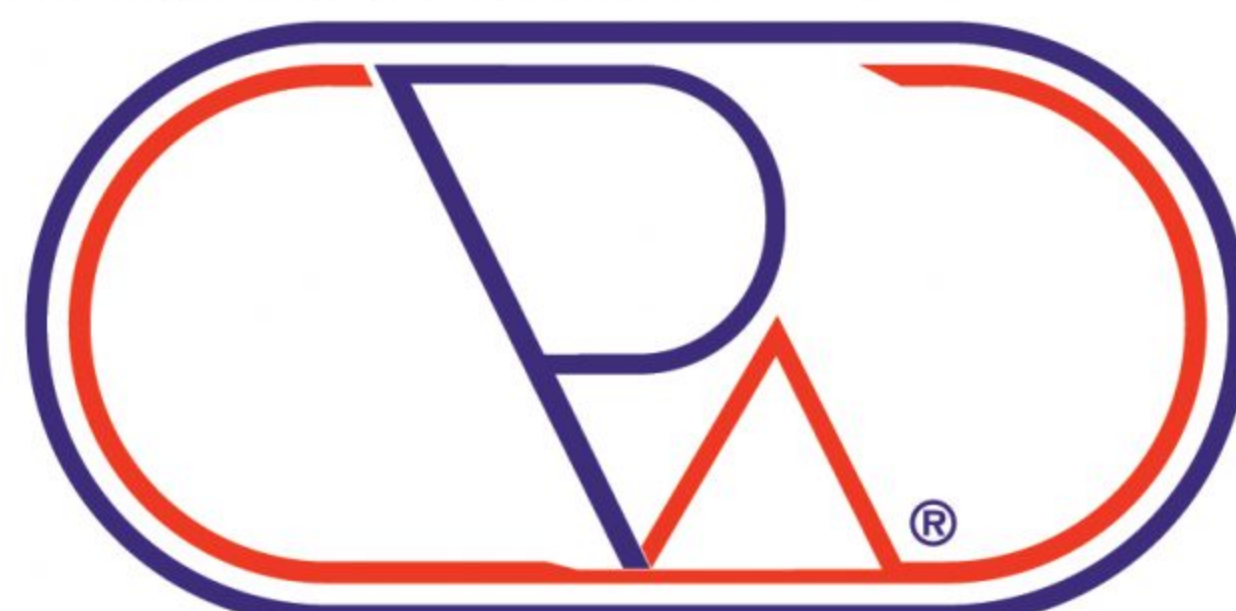

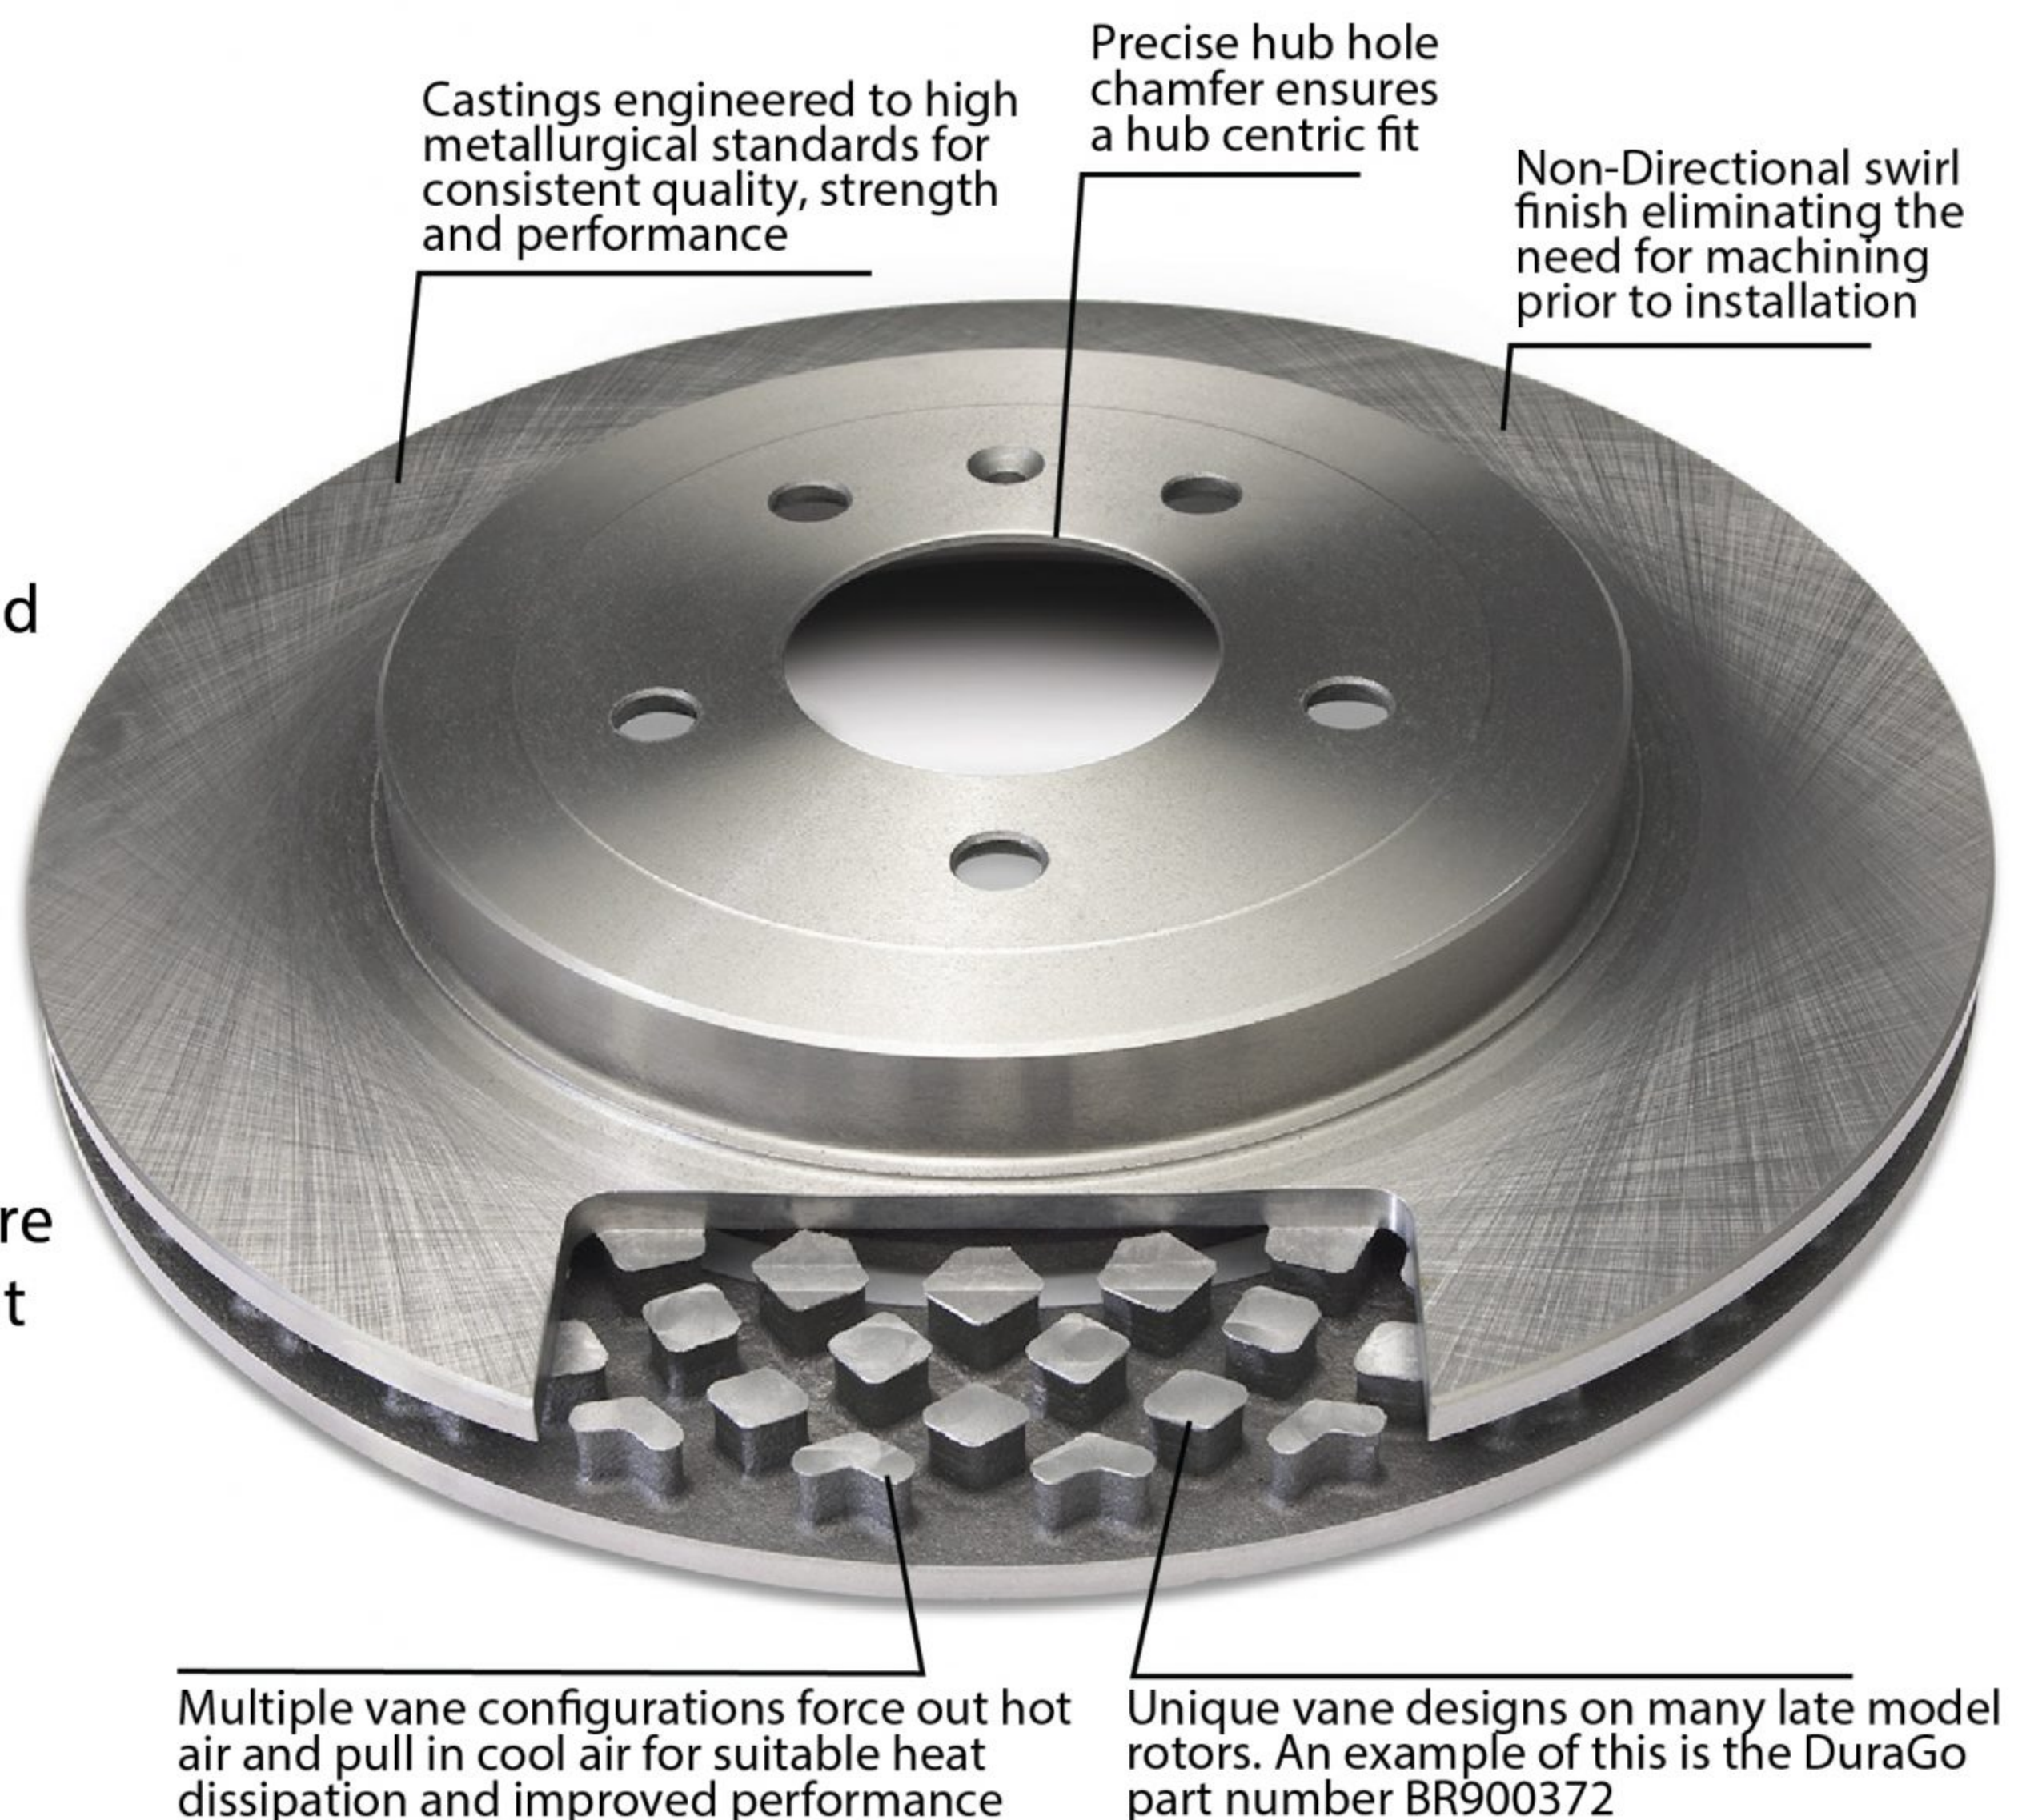

PROVEN QUALITY

- "Multi-Stage" Q.C. process to ensure parts meet dimensional and weight specifications.
- Manufactured in ISO/TS 16949 certified facilities.

DATA EXCELLENCE

- Award winning cataloging that is regularly updated to the e-catalog providers in both Aces and Pies supplied data standards.
- All late model numbers are cataloged prior to introduction.
