Hybrid and Electric Vehicle Operation, Diagnosis, and Repair

LEARNING OBJECTIVE

This training event provides an overview of hybrid and electric vehicle designs, operation, and servicing. Diagnosing and servicing Hybrid Electric Vehicles (HEV) and Battery Electric Vehicles (BEV) requires an in-depth understanding of their design and operation. This course covers the operation of HEV and BEV propulsion systems, driveline configurations, high voltage batteries, drive motors / generators, and charging systems.

The course also covers HEV and BEV servicing procedures including high voltage safety, high voltage disabling/enabling, loss of isolation diagnosis, and range related conditions.
