Schaeffler Bearings and Seals Program

LuK has earned a reputation for the highest quality clutch products. What LuK is to clutches, Schaeffler is to bearings.

1883, Friedrich Fischer invented the steel ball grinding machine, paving the way for the modern ball bearing. Fischer AG, known today as Schaeffler, is one of the leading bearing manufacturers in the world, providing OE solutions for automotive, aerospace, and industrial applications.

Building on a 130-year heritage of excellence, Schaeffler products are supported by the same trusted R&D, engineering and manufacturing teams that bring you LuK clutches.

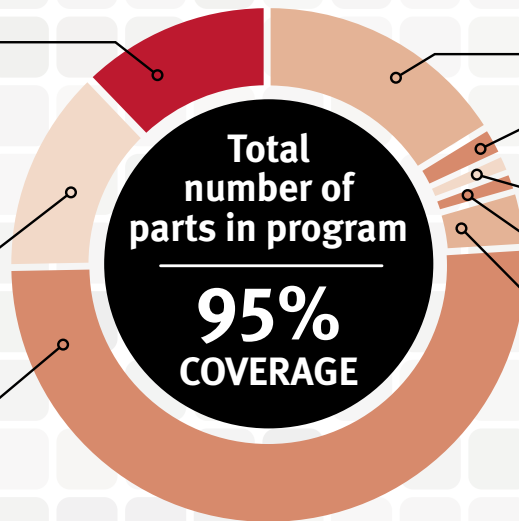

As the world's vehicle manufacturers rely on Schaeffler to develop specifications to perfectly match the characteristics of each new vehicle. These specifications impact the performance and durability of the wheel end. Schaeffler has earned its place as a leading original-equipment supplier by setting the standards and consistently delivering products to meet them.

Schaeffler products — setting the standard for quality, durability, and performance.

Hub & Wheel Bearings (990+)

Tapered Roller Bearings (900+)

Seals (3,900+)

General Bearings (1,750+)

Wheel Set/Kits (220+)

Hanger Bearings (100+)

Tools & Accessories (680+)

Transmissions Kits (320+)

9 Schaeffler manufacturing facilities worldwide dedicated to Hub and Wheel bearings

16 Research and development centers

23,000 Patents held

8,900+ SKUs

**What is inside?
A Schaeffler hub unit.**

PreClamped units from Schaeffler automotive

- Permanent orbital formed clamp of hub assembly at exact preload specifications.
- Nut is used only to secure drive shaft.

Precision in parts

- Exact clearance and uniformity between parts.
- Ultra smooth finished bearing and raceway surfaces.
- Integrated raceways are part of the complete assembly, providing a compact, rigid system.

High quality materials

- High purity steel for superior strength.
- Exact specifications for heat treatments and coatings.

Friction fighters

- High quality lubrication to reduce friction and wear, ensuring longer life.
- Consistent performance under extreme conditions.

Superior seals

- Keep lubricant in and contamination out.
- Resistant to wear and temperature variation.

Newest technology in active safety systems

- ABS ready.
- Traction control.
- ESP control.

Vehicle manufacturers choose Schaeffler for Original Equipment

Acura	GM	Mercedes-Benz
Audi	Honda	Mini
BMW	Hyundai	Mitsubishi
Cadillac	Infiniti	Nissan
Chrysler	Kia	Subaru
Dodge	Lexus	Toyota
Fiat	Lincoln	Volkswagen
Ford	Mazda	Volvo

WHY CHOOSE a world class bearing company?

Original Equipment units are researched, designed and constructed through precision manufacturing to meet the high demands of the vehicle manufacturers - quality, durability and function are stringently controlled by OEM's. Units must meet or surpass the vehicle warranty offered by the manufacturer. No consolidations - the right part for the right vehicle.

5 Reasons to install Schaeffler Bearings & Seals

- OE heritage and tradition**
- Global OE manufacturing network**
- Global innovation leader**
- Premium OE quality content**
- Comprehensive, full-range program for import and domestic vehicles**
