MAGNETIC RIDE CONTROL

BY FCS AUTO

FEATURES

- Thoroughly inspected to guarantee optimum, trouble-free functionality
- Designed and developed to meet the specifications of each application
 - Engineered by top, industry-respected manufacturing experts
 - New shocks, bump stops, rings, and high-grade seals
 - Premium, sturdy design for lasting dependability
 - High quality components precisely tuned

About Magnetic Ride Control

An active suspension system that uses magnetorheological fluid in the shocks to adjust the suspension in real-time, so precise that it reads road conditions every five milliseconds.

About FCS Automotive

A vertically integrated manufacturer, with state-of-the-art quality control.
World leading coverage in ride control.
Best value choice to restore OE performance and driving conditions.

BENEFITS

- Prolongs tire life
- Increases level of comfort
- Improves fuel consumption
- Quick and painless to install
- Reduces noise, vibration and harshness
- Less wear and tear on the suspension system
- Adjusts ride height based on the load weight and a vehicle's speed
